

ACCESSORIES

- Sidemount rigging kit
- Sidemount tank rigging kit for various cylinders: 7 l Alu, S40, S80, 10 l/12 l SS (171 mm diameter)
 - Webbing band + SS buckle + boltsnap
 - 2x stretch cord

- Trim Pocket
- weight pocket for additional 1 kg of lead, ideal to get perfect trim or as a spare weight for your buddy

Belt Knife

- Mask Pocket
- Pocket for a spare mask or accessories

- Soft Weight
- 1 kg, 2 kg and 2.5 kg compatible with FLYside weight pockets

FLY Side weight pockets Red

FLY Side weight pockets Black

- Integrated weight 2x4,9 kg for backplate
- to be fixed on the sides of a backplate

- P-weight 5,5 kg
- to be fixed in the central space of a backplate

HOSES

LP and HP hoses with an extremely high standard of quality, made in Italy.

- Configurations: **LP REG** - for regulator, 3/8" male UNF + 9/16" female UNF, **LP INF** - for inflator, 3/8" male UNF + quick disconnects, **LP DSV** - for dry-suit valve, 3/8" male UNF + quick disconnects (larger ring), **LP RBR**: for rebreather, with 3/8" male UNF (2x) fittings or other standards.
- The **LP Smooth Pro series**, with low-opacity polyurethane outer coating, is the top line for technical/professional use. Colours: Metal Black, Silver, Green, Yellow, Pink.

LP Smooth Pro INF Metal Black

LP Smooth Pro REG Green

LP Smooth Pro INF Silver

LP Smooth Pro REG Yellow

LP Smooth Pro DSV Pink

- The hoses from the **LP Classic series**, specially recommended for recreational use, display good flexibility and a satin finish. They stand out in their category for lightness and solidity.

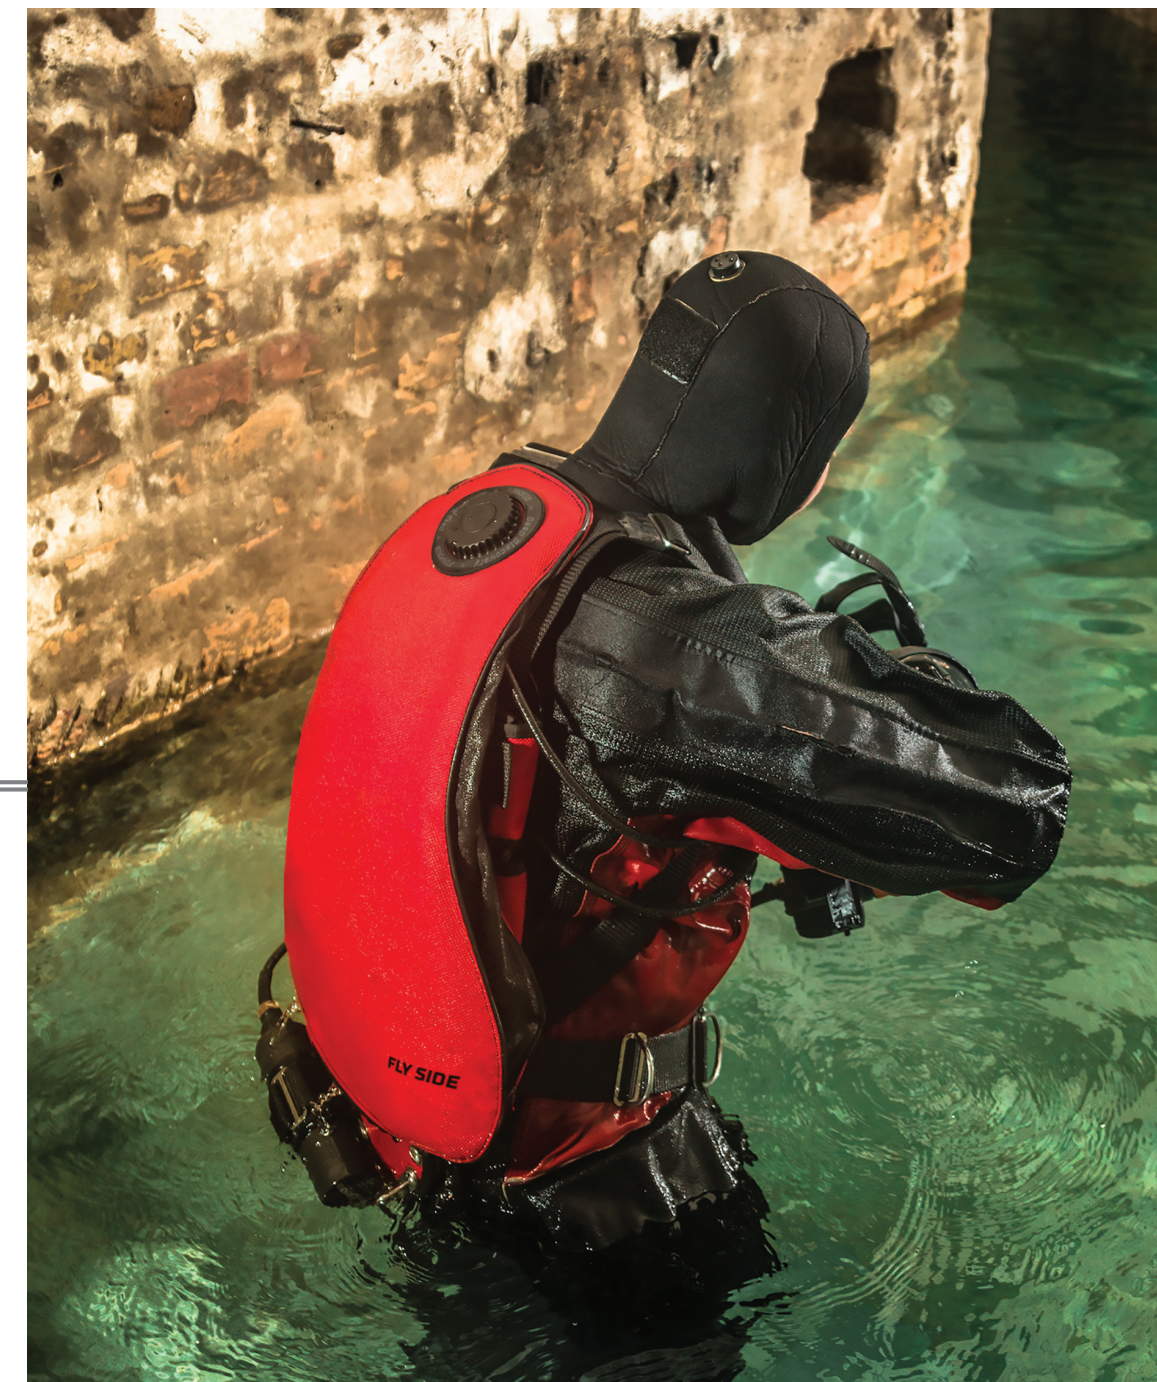

LP Classic

- The **HP Accurate series** of high-pressure hoses stands out for its extreme flexibility and matte finishing. It tops its category for solidity and lightness.

FINNSUB FLY SIDE

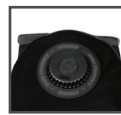

Backplate: optimal weight distribution → perfect trim

Wing perfectly streamlined and flat when inflated

„The best sidemount system for cold water diving“

FL 3600 Long
(canister fixed on the butt plate)

OPV in upper position can be changed for blank plug (included in the package)

FLY SIDE: Complete set

- Low profile wing with 3D harmonica design
- 13 l volume, up to 23 kg of weight
- 3 options of integrated backplate
 - Aluminium black (0,75 kg)
 - Stainless Steel 3 mm (2,75 kg)
 - Stainless Steel 6 mm (5,5 kg)
- Highly durable materials
 - Cordura 2000 outer bladder – RED or BLACK
 - Nylon 420 inner bladder
- 3 entries: inflator, blank plug, over pressure valve (OPV) – all interchangeable
- Unique weight pocket system (2x1 kg, 2x2 kg, 2x3 kg)
- 2 options of additional integrated weight for backplate
- Bungee and 2 bolt snaps attached
- Made in Europe, Czech Republic
- Tested in Europe, Mexico and New Zealand

FLY SIDE: School

- Adjustable harness
- Useful for dive schools and dive centres
- No need to adjust the harness for each diver
- Very fast solution for teaching and renting sidemount

FLY SIDE: Butt plate

- Unique tool holder
- 4 positions for attaching tools
- Position for the light canister
- Hard-set design
- Attached to wing with 4 screws
- Attached to harness with 1 spot

FINNSUB SPELEO

„The Speleo is a sidemount system dedicated for cave divers and explorers at the end of the cave line.“

Speleo is not a follower to the successful FLYside but it complete the existing sidemount portfolio. FLYside was mainly designed for the cold European waters and has a unique modular concept. The Speleo completes the sidemount product line especially for divers who love to travel. Whether in open water or in the narrow spaces of wrecks and caves - the Speleo is your reliable partner with innovative details.

Main specification:

- Innovative buoyancy bladder with shape-adapt-effect - the wing stays streamlined even in maximum air filling
- 2-layer wing made of highly durable materials: Cordura 2000 outer bladder, Nylon 420 inner bladder
- Back-Protect - effectively protects the back from unwanted contact when diving in caves and wrecks and yet is very flexible
- Lead system takes up to 16kg of lead - with an unprecedented feeling of comfort
- Three different sizes (M, L / XL and XXL) ensure a perfect fit and buoyancy:

Size	Buoyancy / kg	Buoyancy / N
M	11,2	110
L/XL	14	137
XXL	24	237

- Different degrees of hardness of the harness webbing ensure stability on the shoulder, but protect the drysuit with a soft crotch strap
- 2 harness versions - DIR and SCHOOL (adjustable shoulder straps) for quick adjustment for students or frequent suit changes

- The Mexico version is ideal for pure cave exploration - without a central weight system, but optionally with two weight pockets (trim pockets)
- Internal outlet valves or inflator units offer the best protection in narrow spaces, alternatively external valves / inflator units are available on request
- With the “out-of-the-box” system it’s possible to dive almost immediately after purchase

Developed and tested by famous cave divers: Robert Uhlmann (sidemount instructor, sidemount-forum.com), Martyn John Farr (explorations in New Zealand), Daniel Hutnan (explorations in Mexico).
